DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 and 39 of U.S. Patent No. 6,615,935. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-9 are substantially the same as claims 1-11 of 6,615,935 except for the claims of 6,615,935 calls for "pressurizing the applied mixture under elevated temperature to form the wear resistant surface". Claim 1 of 6,615,935 fully encompasses the claims of the instant application and it would have been considered obvious to eliminate the pressurizing limitation from the claims of 6,615,935. Claim 10 is substantially identical to claim 39 of 6,615,935 except for attaching the portion by brazing. It would have been considered obvious to attach the wear resistant material by brazing.
